- This website encourage plantation and distribution of free mutated seeds to encourage greenery with functional web-pages.
- Full-stack developer Wrote and reviewed code for Html,CSS JS.

PROJECTS

PERSONAL PORTFOLIO
Checkout Github.

GENDER AGE DETECTION USING IMAGE PROCESSING THROUGH CNN
The project aimed at predicting an individual's gender and age using image recognition through a Convolutional Neural Network (CNN). The researchers likely used a dataset of images with known gender and age labels to train the CNN.

DBMS COVID-BED SLOT BOOKING MINI PROJECT | FRONT-END: HTML JAVASCRIPT CSS. BACK-END: PYTHON (FLASK) MYSQL.
Covid bed slot booking system is proposed here which simplifies booking of beds easier through web. Increased demand of beds due to pandemic (COVID-19) which allows all domains to access at one place. Providing much options with ease of booking bed slots. **live project** .
